

Living and care: services and quality

Our nursing homes are in-patient care facilities, where the residents are thoroughly taken care of and looked after competently around the clock at all nursing stages. Even demented people find a loving home with us. In addition to long-term care, we also offer preventive and short-term care when places are available.

The provisioning for the inhabitants is strongly influenced by our mission and the maxim “In dignity cared for” – which we live daily. We focus on the kind of care in which the residents are encouraged to be independent, can learn and are, as far as possible, mobile in their daily activities.

The quality of care is another important point for us. We always strive to achieve very good MDK grades by working according to our own quality manual, quality tests and certifications, which is done successfully.

The majority of the rooms available in our residences are single or even double rooms, which can be used as single rooms. If a double occupancy is desired, we can also fulfil this wish.

All our nursing homes are large enough to be equipped with own kitchen and own laundry and house cleaning service. We emphasize cleanliness and tasty, healthy food in our facilities.

We can assist you with administrative matters, such as applying for a care plan, as well as moving. Use our hotline no. +49 (0) 89 14 33 29 19 26, if you need an immediate nursing care centre or call the relevant nursing house directly. Facilities are available 24 hours.
